

Flat Inspection Conveyor

MODEL # 10149

Simple flat sorting conveyor used for small fruits like blueberries, cranberries, grape tomatoes, or other similar products.

How It Works

Product carries on the conveyor belt where people stand along each side and visually inspect the product for defects. Defect product is manually removed and dropped into the trash lane along the edge of the belt. Good product discharges off the end of the belt while defects are wiped off through a trash chute and into a lug before they reach the end of the conveyor.

Features

- 30" wide x 18' long main grading area
- Easy wipe-clean design (Main conveyor and 3" trash lanes are all on the same belt)
- All stainless steel construction including bearings and motor
- Non-staining smooth rubber belt
- Trash collection "Lug Rack" for 30lb blueberry lug
- Adjustable legs to accommodate various heights

Available Options

- Casters
- Plastic link or wire mesh sprocket driven belts
24" - 38" (when not equipped with casters)
- Variable speed
- Wider / longer models are also available
