

Stick Eliminator

MODEL # 11535

Maximize efficiency by reducing cleaning time and eliminating clogs and jams in the process line with this machine. The Stick Eliminator separates and removes sticks and large debris from product flow, so, you can take product straight from the field to the process line.

How It Works

Product is conveyed through custom-turned aluminum scalping rollers. The product falls through the roller bed, while sticks and debris are carried over the rollers to a partitioned trash conveyor

Features

- Stand-alone design
- Variable speeds
- Easy to clean

Available Options

- Casters
- 24" - 42" Widths
