

# PUSH THRU LUG & CONTAINER WASHER

**QUICKLY FLUSH AWAY LOOSE DEBRIS & SANITIZE FIELD CONTAINERS**

**LAKWOOD PROCESS MACHINERY Push Thru Lug Washer**

- Includes initial wash section, and rinse section
- Includes adjustable guide rail system
- Includes easy-access drain plug
- Includes sieve screen for debris removal

The container is positioned upside-down onto the lug washer's infeed guide rail section. As a second container is staged on the lug washer's infeed section, the first container is pushed through the wash manifold where the container is flooded from above and below. No corners or crevices are untouched. The water and debris that comes off of the container is screened through a sieve into a reservoir and recirculated. The containers exit the opposite end of the conveyor onto an accumulation zone.

**Push Thru Lug Washer Capacities**

\* Push Thru Lug Washer Capacities (Lugs per hour)

Dependent on speed of personnel

\* Capacities listed above are greatly dependent on the container size you are washing. Capacities listed are for 24" long lugs.
